

UniJobs Platform

1. Introduction

1.1 Purpose

This document describes the requirements for a platform that integrates multiple job portals such as LinkedIn, Indeed, and Rozee.pk into a single unified system. The platform will allow users to search and apply for jobs from different sources in one place.

1.2 Scope

The system will:

- Aggregate job listings from multiple platforms
- Provide a unified search experience
- Allow users to apply for jobs
- Help recruiters post and manage jobs

2. Overall Description

2.1 Product Perspective

The system acts as a job aggregator, similar to Google for jobs.

2.2 Product Functions

- User registration & login
- Job search with filters
- Job recommendations
- Apply to jobs
- Save/bookmark jobs
- Employer job posting
- Admin dashboard

2.3 User Classes

- Job Seekers
- Employers
- Admin

3. Functional Requirements

3.1 User Registration & Login

- Users can sign up using email or social accounts
- Users can log in securely

3.2 Job Search

- Search by keyword, location, salary
- Filter by company, job type

3.3 Job Aggregation

- System fetches jobs from platforms like LinkedIn, Indeed, Rozee.pk
- Updates listings regularly

3.4 Job Application

- Users can apply directly OR redirected to original platform

3.5 User Profile

- Upload CV
- Add skills, education, experience

3.6 Notifications

- Job alerts via email or app

4. Non-Functional Requirements

4.1 Performance

- Fast search results (< 3 seconds)

4.2 Security

- Secure login and data encryption

4.3 Usability

- Simple and user-friendly interface

4.4 Scalability

- System should support thousands of users

5. Future Enhancements

- AI-based job recommendations
- Resume builder
- Interview preparation tools
